Professional Summary

Final-year B.Tech student in Artificial Intelligence and Data Science with strong knowledge in Excel, SQL, Python, and Power BI. Skilled in data cleaning, data visualization, and generating business insights through internships and academic projects. Seeking a Data Analyst role to apply analytical and technical skills to solve real-world business problems.

Education

JCT College of Engineering and Technology, Coimbatore Sep 2023 – July 2027
B. Tech in Artificial Intelligence and Data Science CGPA: 8.5/10

Mount Carmel Matric Hr. Sec School 2022
12th Grade 75%

Skills

Programming & Query Languages: Python, SQL

Data Analysis Libraries: NumPy, Pandas, Matplotlib

Data Analysis & Manipulation: Data cleaning, exploratory data analysis (EDA), data visualization

Data Analyst Tools: Excel (Pivot Tables, VLOOKUP, XLOOKUP, IF, Charts), Power BI (Dashboard Creation)

Database: MySQL

Version Control: GitHub, Colab

Experience

Novitech 03 July 2025

AI Intern — Full-Time

- Worked on data preprocessing and basic machine learning model implementation using Python.
- Applied NumPy and Pandas for structured data handling and analysis.
- Evaluated model performance and contributed to improving prediction accuracy through feature refinement.

Pumo Technovation 07 Dec 2025

Data Analytics Intern — Full-Time

- Performed data cleaning and preprocessing using Excel and Python to improve dataset accuracy and consistency.
- Conducted data analysis and created interactive dashboards in Power BI to generate actionable business insights.
- Assisted in preparing analytical reports and visual summaries to support decision-making processes.

Projects

Emotion Detection Using Machine Learning

- Developed a machine learning model to detect human emotions from facial expressions using Python.
- Applied data preprocessing, feature extraction, and classification techniques for emotion recognition.

Kaggle Data Visualization Project

- Analyzed real-world datasets from Kaggle to identify trends and patterns.
- Created visual dashboards and charts using Python and Power BI.
- Performed exploratory data analysis to derive meaningful insights.

Voice-Based ATM System

- Designed a voice-enabled ATM interface using Python to assist users with secure transactions.
- Integrated speech recognition modules for command processing.

Certifications

- Data Analytics Internship Certificate – Pumo Technovation
- AI Internship Certificate – Novitech
- NPTEL Certification – Cloud Computing

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
